ABOUT ME

I am a skilled Full-Stack Developer with extensive experience in both frontend and backend development. I specialize in creating visually stunning, dynamic, and responsive websites and applications. My expertise spans a wide range of modern design tools, frontend frameworks, and backend technologies, allowing me to build aesthetically pleasing and highly efficient solutions.

Design Skills:
- Adobe Photoshop
- Adobe Illustrator
- Adobe XD
- Figma
- Sketch
- InDesign
- Procreate

Frontend Skills:
- HTML5
- CSS3
- JavaScript
- ReactJS
- VueJS
- NextJS
- TailwindCSS
- Bootstrap
- SASS

Backend Skills:
- Node.js
- Express.js
- PHP
- MySQL
- PostgreSQL
- MongoDB

Other Skills:
- Git/GitHub
- RESTful APIs
- GraphQL
- Docker
- AWS
- Firebase

I excel in crafting seamless user experiences and have a keen eye for design, ensuring my projects are both functional and visually appealing. I am enthusiastic about bringing my skills to your team and contributing to innovative and effective solutions.

WORK EXPERIENCE

23/09/2023 – 31/12/2023 North shields, United Kingdom
WEB DEVELOPER(FREELANCE) VICTOR

In my current position as a Senior Frontend Developer at Uneleap, my role involves designing and developing robust web applications. Using Figma, I craft intuitive and visually appealing website layouts, ensuring an exceptional user experience. I then bring these designs to life with HTML and CSS, paying meticulous attention to detail to achieve pixel-perfect implementation. My responsibilities include creating responsive and interactive user interfaces, optimizing

performance for various devices, and ensuring cross-browser compatibility. By collaborating closely with the design and backend teams, I ensure that each project meets both aesthetic and functional requirements, resulting in seamless and engaging web applications.

01/08/2023 – 10/10/2023 Uttar Pradesh, India
WEB DEVELOPER(FREELANCE) VAIBHAV

In my previous position, I took on the responsibility of directing and supervising the creation of dynamic user interfaces within the organization. I effectively designed a user interface that enables the generation of randomly displayed visual elements as part of a collection with figma, integrating royalty features for a popular marketplace like OpenSea. I utilized various APIs and storage solutions, such as those provided by Arweave and ArDrive, to enhance the user experience. This was achieved through the implementation of front-end technologies, with a focus on languages like HTML, css, tailwind css , JavaScript, AngularJs. Moreover, I developed a user interface tailored for seamless navigation and interaction within an NFT marketplace.

05/01/2023 – 06/10/2023 Miami, United States
WEB DEVELOPER(FREELANCE) NICK VALLADARES

I took on the comprehensive task of building the entire application, handling both the user interface and server-side functionalities. On the front-end, I crafted the application's visual components using Angular Js, Bootstrap, CSS, and Redux, with additional integration mongodb api for specific features. Turning to the back-end.

06/01/2021 – 03/02/2023 Enugu, Nigeria
FULLSTACK WEB DEVELOPER ANI CLETUS

I constructed websites and transitioned into an educator's role, instructing students in the fields of front end development and web design at the school.

07/03/2020 – 26/07/2020 California, United States
WEB DEVELOPER(FREELANCE) UPWORK

I played a crucial role in streamlining the release of our application, handling tasks like setting up automated deployment workflows, managing the infrastructure that supports the user interface, and ensuring a seamless process of continuous integration and delivery. Additionally, I incorporated robust security measures to protect the front-end aspects of the application. On the frontend, I utilized ReactJS, CSS, and Stripe for seamless payment integration. For the backend, I used PHP and MySQL to handle server-side logic, database management, and ensure efficient data retrieval and storage.

17/09/2019 – 23/12/2019 Granada
GRAPHIC DESIGNER(FREELANCE) FIVER

I designed visually compelling fliers for an online iGaming event using Figma and Adobe XD. This involved creating eye-catching layouts, incorporating the event's branding elements, and ensuring the final designs were optimized for both digital and print media. The project required close collaboration with the marketing team to capture the essence of the event and attract the target audience effectively.

EDUCATION AND TRAINING

14/03/2020 – 02/02/2022 Gonda, India
ADVANCED DIPLOMA IN SOFTWARE ENGINEERING Applied Technology
