EXPERIENCE

Uneleap, **North Shields, England, United Kingdom** —
Fullstack Blockchain Developer

September 2023 - PRESENT

In my current role as a Senior Fullstack Blockchain Developer at Uneleap, I am responsible for designing, developing, and maintaining a blockchain network using Golang, Move, Rust, and Cosmos SDK. My contributions include creating a native token for transactions, building an NFT marketplace utilizing frontend technologies like JavaScript and React, ensuring interoperability with other blockchains, implementing banking services, and prioritizing security measures. I also focus on optimizing scalability and actively engage with the community to foster adoption and drive innovation within the organization

Poltu, **Gonda, Uttar Pradesh, India** —
Smart Contract Developer

August 2023 - October 2023

I held the role of overseeing and managing the development of smart contracts within the organization. I successfully designed a contract facilitating the creation of randomized NFTs as part of a collection, incorporating royalty mechanisms for OpenSea, leveraging Arweave APIs and ArDrive, while implementing the Solidity programming language. Additionally, I constructed a smart contract tailored for an NFT marketplace.

Rethestate, **Miami, Florida, United States** —
Fullstack Blockchain Developer.

January 2023 - October 2023

I was responsible for constructing the entire application, covering both the front-end and back-end aspects. For the front-end, I developed the application using ReactJS, Bootstrap, CSS, and Redux, while also incorporating PHP. On the back-end, I utilized Solidity in conjunction with the Infura and IPFS APIs to establish the smart contracts required for the minting and marketplace functionalities within the NFT

SKILLS

Blockchain Development

Smart–Contract Development.

Frontend Development.

API Integration.

Security Implementation.

Interoperability.

Cross–functional collaboration.

LANGUAGES

English,Spanish,Maltese

marketplace application.

Aptech, Gonda, Uttar Pradesh, India —
Web Developer

January 2021 - February 2023

I constructed websites and transitioned into an educator's role, instructing students in the fields of front-end development and web design at the school.

EDUCATION

University of Wolverhampton , Wolverhampton, West Midlands— *Bachelors Degree in Computer Science.*

September 2023 - PRESENT

Applied Technology(Aptech),India — *Degree*

January 2020 - February 2023

PROJECTS

Rethestate— *Nft Marketplace*
